Data Analyst

EDUCATION

Polytechnic University of the Philippines — **Manila, Metro Manila**
Bachelor of Science in Computer Science — *Graduation Date: Sep 2026*
1.52 GWA

TECHNICAL SKILLS

Languages: SQL, Python, JavaScript, C
Data & BI Tools: Microsoft Excel, Power BI, Power Automate, Power Apps
Databases: MySQL, PostgreSQL
Libraries & Analysis: Pandas, NumPy, scikit-learn

PROJECT EXPERIENCE

Fraud Dispute Detection Analysis
Github

- Queried and cleaned 8,000 disputed transactions in SQL, then engineered risk features across merchant category, account age, and geography in Python to support exploratory analysis and a Random Forest classification model.
- Evaluated model performance against held-out data (0.75 ROC-AUC) to translate raw transaction records into a ranked list of likely-fraudulent disputes for analyst review.

Automating a Personal Budget Diagnosis
Portfolio

- Rebuilt a hand-maintained Excel budget-diagnosis workbook using VLOOKUP and SUMIFS to pull monthly category totals directly from a 60+ tab transaction log, removing the need for manual re-entry.
- Caught and fixed a live formula bug (a SUMIF referencing the wrong column) that had overstated a dependent total by roughly 20%, then added a reconciliation check that verifies the automated totals against the raw log every month.

LORECAST
Github

- Owned data cleaning and preprocessing for a 50,000-row CNN/DailyMail article dataset as part of a Longformer-based NLP summarization thesis, resolving formatting and labeling inconsistencies ahead of model training.
- Measured and reported model performance (ROUGE-1 +8.08 pts, ROUGE-2 3x) against baseline, leading a team of four through the data-to-results pipeline.

WORK EXPERIENCE

Citigroup Business Process Solutions Pte. Ltd. — **Taguig, Metro Manila**
Service Analyst — *Oct 2025 - Present*

- Analyzed and communicated complex financial data in real time, interpreting live figures on the spot to answer impromptu client questions.
- Built a daily Excel KPI tracker covering all 7 of my metrics, with formulas that auto-flag any day below target — helped me consistently hit my own monthly KPI goals, and after sharing it with a 19-person team, contributed to the team surpassing its average KPI scores.

Hacktiv Colab Inc. — **Makati, Metro Manila**
Project Management Intern — *Jul 2025 - Aug 2025*

- Applied the Microsoft Power Platform — Power BI, Power Automate, and Power Apps — alongside PMBOK-based risk/issue/change tracking to streamline project data collection and reporting.
- Built Power BI dashboards that gave stakeholders a clearer, more transparent view of project metrics, supporting faster and more evidence-based decisions.

Coforge — **Muntinlupa, Metro Manila**
Associate Team Member — *Feb 2023 - Jan 2025*

- Assessed and categorized 1,500+ disputes monthly as fraudulent or legitimate by analyzing transaction and account data patterns, improving fraud-detection accuracy by 30% while safeguarding sensitive financial information.
